

LH Architects | Full time | Location: Boca Raton, FL | In office | 305.491.3320 | LH-Arch.com

Architectural Job Captain (Intermediate Level) | Revit Required

About LH Architects

LH Architects is a technology forward architecture and interior design firm built for modern project delivery. We believe great design is only as strong as the process behind it, so we pair thoughtful, creative work with disciplined execution. We are BIM first and Revit driven, using smart workflows and modern tools to coordinate better, move faster, reduce rework, and make the experience smoother for clients, consultants, and project teams.

We partner with developer and owner clients across South Florida on multifamily, mixed use, commercial, and other high impact projects. We are growing quickly and looking for a strong Revit job captain who wants meaningful responsibility, visibility, and a clear path to project management.

What makes LH different is our culture: positive, collaborative, and genuinely fun, while holding high standards. People are trusted early, supported by a strong team, and given real runway to grow into leadership as the firm scales.

As an Architectural Job Captain at LH Architects

This role is designed for a highly organized, Revit strong professional who will start under a Project Manager and take ownership of day to day project documentation and coordination. You will help drive the drawing set, support consultant integration, and keep the model and deliverables clean and on track. As you grow, you will gain more client exposure and leadership responsibility, with the goal of progressing into a Project Manager role.

Responsibilities

- Support project teams through SD, DD, and CDs, with exposure to permitting and construction administration
- Build, maintain, and coordinate Revit models and drawing sets with strong organization and sheet standards
- Develop plans, elevations, building sections, wall sections, and details with constructability in mind
- Coordinate with consultants and integrate information into the model and documents
- Assist with internal QA QC and help keep deliverables accurate, coordinated, and on schedule

- Produce 3D views, diagrams, and renderings as needed to communicate design intent
- Support code and zoning research and coordinate compliance items with the PM team
- Support construction administration tasks as needed, including RFIs, submittals, and field observation documentation

What We Look For

- Bachelor of Architecture degree or Master of Architecture degree
- Intermediate level experience, typically around 5 years (approximately 3 to 7 years considered depending on skill level)
- Autodesk Revit proficiency required (BIM first workflow)
- Strong documentation skills and ability to manage drawing sets and deadlines
- Experience with modeling and rendering tools such as Advanced Revit, Autodesk Construction Cloud, Navisworks Manage, Bluebeam Revu, Dynamo for Revit, Rhino plus Grasshopper, Lumion, D5 Render, Enscape, Twinmotion, SketchUp and Adobe Creative Suite (InDesign, Photoshop, Illustrator) for presentations, Microsoft 365 (Excel, Outlook, Teams) for coordination.
- Understanding of architectural technology, building systems coordination, and production documentation
- Working knowledge of basic code and regulatory requirements and building constructability
- Strong communication skills and ability to collaborate with clients, consultants, contractors, and internal team members
- Ability to juggle multiple tasks, collaborate on teams, and work well under deadlines
- Registered or pursuing registration preferred; LEED AP is a plus
- Applicants must be authorized to work for any employer in the U.S. We are unable to sponsor or take over sponsorship of any employment visa at this time

Our Culture

We take our work seriously and keep the environment positive, creative, and fun. We are a collaborative, high standards team that communicates clearly, supports each other, and moves quickly. You will have meaningful responsibility, direct access to leadership, and real opportunity to grow as the firm scales.
